Information Security Policy

Kinetic moves people. Protecting the information and systems that support our services, our people, and the trust of our customers, partners and regulators is fundamental to how we operate.

Kinetic recognises that information security is fundamental to earning and maintaining the trust of our people, our customers, and our regulators. To achieve this Kinetic will:

GOVERN

information security through defined roles, responsibilities and authorities, with oversight, direction, and the resources needed from our Executive Leadership Team.

PROTECT

the confidentiality, integrity and availability of information assets across all formats, systems and locations.

MANAGE

information security risk through a consistent process, with risks assessed, owned and treated in line with our risk management framework.

EMPOWER

our people, contractors and partners with clear policies, standards and guidance to make informed, secure decisions.

COMPLY

with applicable legal, regulatory and contractual information security obligations, and with the supporting policies, standards and procedures we maintain.

RESPOND

to information security incidents, weaknesses and risks in a timely and proportionate manner to minimise harm.

MAINTAIN

an Information Security Management System (ISMS) aligned to ISO/IEC 27001 within its defined scope.

MEASURE

our performance against information security objectives that are set, approved and reviewed by the Executive Leadership Team at least annually.

IMPROVE

our security posture continuously, informed by audits, risk assessments, incident learnings and the evolving threat landscape.

This Policy applies across all Kinetic entities - to our people and contractors, and, through their agreements with us, to the suppliers, partners and other third parties who access Kinetic systems or information. Our Executive Leadership Team is accountable for this Policy and for making available the resources needed to give effect to it.

This Policy is published on the Kinetic website and is available to our people, customers, suppliers, partners and other interested parties. Certification is scope-specific: the scope of any certificate we hold is stated on that certificate and is available on request. The detailed policies, standards and procedures that support this Policy are maintained within the Kinetic Way.

Michael Sewards
Group CEO

This Policy is reviewed at least annually, and earlier whenever significant change occurs to Kinetic's operations, risk environment or legal, regulatory or contractual obligations
